VSY'S FLAGSHIP MAKES HER GRAND DEBUT IN VIAREGGIO

VSY-VIAREGGIO SUPERYACHTS PRESENTED THEIR 72-METRE FLAGSHIP STELLA MARIS IN VIAREGGIO ITALY ON JUNE 23. The Stella Maris comes after the resounding success of the two previous 62-metre yachts Candyscape II and RoMa – which in recent years have been directly instrumental in projecting VSY as super-yacht builders

Managing Director of VSY, Luciano Scaramuccia stated that the impressiveness of

this 72-metre - conceived in line with the yard's values and reflecting the fusion of avant-garde technology and the excellence of genuine Italian craftsmanship in full respect of the environment - crowns her as the most important yacht of this size built in Viareggio over the last 30 years.

At present Stella Maris stands on the large square in front of the shipyard, illuminated in a play of multi-coloured lights at night. There she will remain for some weeks to complete the final preparations for her transfer on a floating pontoon to the Arsenal in La Spezia where she will finally touch water at the official launch. After this, she will take to the open sea until September when she will participate in the Monaco Boat Show.
